TAILLIGHTS

1955 TAILLIGHT HOUSING ASSEMBLY

Our 1955 taillight bezels and lenses have always been the best in the industry, but with the addition of the housings we can offer the complete assembly. The taillight assemblies come with everything you need to completely refresh and beautify the taillights on your project. Danchuk #15512 will work on any 1955 classic Chevy. Proudly **Made in the USA***.

1956 Good	#16742	\$18.95/pr.

1956 TAILLIGHT REFLECTOR LED KIT

Not your standard 1956 taillight reflector. This replacement 1956 taillight reflector adds the custom touch and safety of five bright LED lamps to brighten up the rear of your classic. The LED lights are easily wired into your existing wiring harness and improve visibility without changing the original classic design.

1956 TAILLIGHT HOUSING ASSEMBLY 

We've gone over the top with this one by starting with a perfect set of originals and making all the tooling **in the United States of America**. We copied every curve and contour to make six different molds for all the castings. Then we made numerous stamping dies for the bulb sockets, gas door parts and even the original style clip that safely holds the wiring in place. After all parts look and fit together perfect, we send them out to get the best quality chrome plating money can buy. The end result is a set of taillight housings that are absolutely breath taking. We also include all mounting hardware, reflectors, seals, gaskets and a pair each of our spectacular red taillight lenses and clear back-up light lenses.

1957 TAILLIGHT HOUSING ASSEMBLY 

Since 1957 these beautiful taillights have brilliantly lit up the rear of our classics. And we couldn't be happier with the results of our American made tooling on these show stopping pieces. They fit exactly like originals and do we dare say, look better? We put hours into hand working each casting before the chrome process even begins. After each casting is prepped then we put the best show quality chrome money can buy and then finish them off with correctly pressed in light bulb sockets, bulbs, gaskets, studs, screws, seals and the most gorgeous Danchuk made red lenses there are. **"Danchuk, There's No Comparison"**. Part #16757 is HOUSING ONLY, so light bulb sockets, bulbs, gaskets, studs, screws, seals, and lenses are not included.

DIGI-TAILS CONVERSION KITS

DIGI-TAILS kits are safer and brighter than standard factory lights or other LED kits because these light-panels contain high-intensity wide-angled LEDs that are strategically positioned to maximize light output and fully optimize your lenses. These are also the only fully sequential LED kits. DIGI-TAILS utilize advanced technology by lighting LED's in a fluid and sweeping pattern, rather than merely lighting up blocks of LED's. DIGI-TAILS allows you to choose standard operations or the fully sequential feature with a flip of a switch, conveniently located on every board. Due to the LED's low resistance a new electronic flasher, part #13677, is recommended. Included pigtail kits come complete with everything needed to replace your old standard bulbs with high quality LED lighting; clear instructions are included.

DELTA XENON AND H.I.D. HEADLIGHTS

Delta H4 and H.I.D. headlights are a direct replacement for your stock sealed beam lights and re-use the original mounting hardware and connectors. Delta headlights are available in bright white Xenon or High Intensity Discharge (H.I.D.). Lenses are available in two styles; classic curved lenses like the originals, or Euro that have a flat European style lens with a built-in city light that can be wired as a park/turn light or daytime runner. Note: to install Delta or H4 headlights minor trimming to sealed beam bucket is necessary. We recommend that when installing H4 type headlights that a relay kit such as #16826 be installed for better performance and to reduce the load on the headlight switch. H.I.D. headlights may not be DOT compliant, please check your local regulations for approval.

DAPPER LIGHTING OE7 LED HEADLIGHTS

The Dapper Lighting OE7 has their LED projector technology in a package that looks original, but with a clear lens. They deliver 3X more light than a traditional H4 conversions and they draw 65% less power than a sealed beam. Their patent pending Active Cooling System provides up to 30% cooler LED operating temperatures than other brands so your LED's will last longer. The OE7 also features Progressive Low/High output to aid your eyes when driving at night. When you turn on your hi-beams, your low beams dim so your eyes can adjust to seeing light further down the road and studies show the foreground light should be decreased to increase distance visibility.

HEADLIGHT RELATED

HALOGEN HEADLIGHTS WITH LED HALO

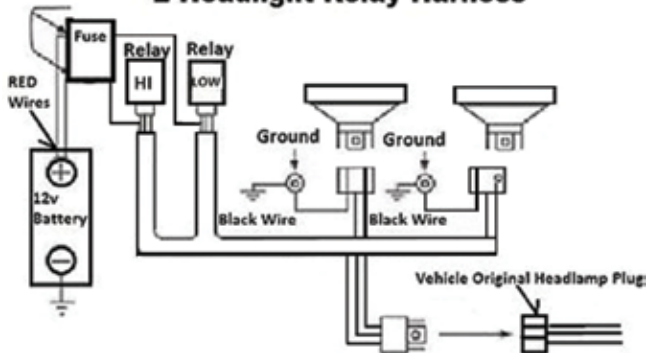

These Halo headlights feature SMD LED in white or multi-colored and use an H4 halogen bulb that produces a brighter light than OE. The Halo lights can be wired as a daytime running light.

On part #17941, the wireless remote allows you to change the color of the LED ring of the headlight on the fly. With 16 colors to choose from you can have a different look every day. Kit includes two headlamp assemblies with a multi-color LED ring, two removeable H4 bulbs, dust boots, RGB harness, ceramic pigtail and a wireless remote.

2-Headlight Relay Harness

1. Plug in and install headlamp.
2. Ground both black wires from headlamp plugs.
3. Attach single red wire to Positive battery.
Single red wire now powers both relays.
4. Plug harness to original vehicle headlamp plug.

H4 HEADLIGHT RELAY HARNESS

Installing the latest H4 or other headlight technology in your classic? Want to get the most out of your stock OE or aftermarket headlights? This relay kit allows maximum voltage to the headlights and takes the load off of the headlight switch making it run cooler and last longer. Headlight relay kits are HIGHLY recommended when installing high performance headlights, such as H4 and other halogen bulb types. With the extra current draw that aftermarket halogen headlights put on the stock headlight switch, the safety circuit can sometimes trip. Works with bulbs with OE style terminals. Not required when using H.I.D. or LED lights.

HEADLIGHT SWITCHES

Without these your headlights and dash lights will be dark. Our #117A is an exact reproduction of the GM original with the built in fuse. So, if your original is giving you trouble, we have the switch for you. Also listed in Switches section on page 274. We highly recommend replacing the retaining nut as well.

COMPLETE 1956 PARKLIGHT HOUSING ASSEMBLY

Just another example of our attention to detail. The 1956 parklight backing plates

are a series of complex contours stamped out of the finest steel. The parklight housings are cast from molds produced by our master toolmakers in Santa Ana, California. We hand work the castings until they are perfect and then both the backing plates and housings are treated to the finest show quality chrome plating you can get. **Made in the USA***.

PARKLIGHT LENSES

We produce all of our lenses in-house for the highest quality control. Our plastic part production was founded on the 1957 lens, and that success led to the 1955 and 1956 lenses. We feel proud of the beautifully polished, mirror-like surfaces found on our entire line of plastic parts, faithfully reproduced since 1977. Gaskets and hardware not included. BACK-UP LIGHT STAINLESS CONVERSION PLATES

Because back-up lights were optional in 1955 and 1956, many cars today still don't have this necessary feature. Along with the back-up light conversion plates, you'll need one wiring harness, found on page 251; two bulbs, found on page 82 and a neutral safety switch, found on page 276. Our back-up light conversion plates are made of durable stainless steel and sold in pairs. **Made in the USA.**
