**POLISHED ALUMINUM DASH TRIM SETS**

If it's the custom look you're after for your 5-6-7, then we have the dash trim for you. These thick and durable pieces are beautifully polished. Due to thicker material, filing and trimming of the bezels may be required for a proper fit. Parts #13791 and #13792 come with gauge panels so you can install gauges of your choice, but some cutting may be required.

**DASH LENS SETS**

These highly polished, injection moulded lenses have been reproduced to duplicate the originals exactly. Our top-quality plastic and highly polished moulds make them the clearest lenses on the market. All numbers and letters are recessed on the back side and painted white. Edges of the lenses are painted green to transmit color to the letters when backlit, just like Chevy produced them in '55, '56 and '57. **Made in the USA.**

Please note all lenses are clear but grayed to show details in photo.

 1957 Automatic (Shown)..... #1842..... \$28.95/ea.

**INSTRUMENT CLUSTER BEZEL SETS**

Every part of these instrument cluster bezel sets was painstakingly reproduced. The 1955-56 standard and automatic instrument clusters include both sides of the symmetrical 'double bubble' dash layout. The instrument cluster bezel, the passenger side bezel, and both steering column bezels have been chrome plated to perfection. The passenger side bezel includes the original design black screen, pre-drilled for easy script installation. 150 and 210 models use the chrome "Chevrolet" script, part #1055. 1955 and 1956 Bel Airs and Nomads use the gold "Bel Air" script, part #626. Bezels should be mounted with new gaskets. New dash lenses, shown on page 98, complete the assembly.

**ORIGINAL REPRODUCTION GAUGES**

These brand new reproduction gauges are ready to install, as original. The speedometer assemblies come with the turn signal, high beam lens and odometer. Fuel gauges are just like the originals in every detail, fuel senders are sold separately. The 1955 temperature gauge has the capillary tube and 3/8" fitting, as original, and the 1956 and '57 temperature gauges look like GM made them. 1956 temperature sender, #093 and 1957 temperature sender, #094 sold separately. If you are doing an engine conversion in your '55 you might want to use the 1956 electric gauge, which allows for more flexibility in installation.

**HDX, DAKOTA DIGITAL INSTRUMENT CLUSTERS**

The Dakota Digital HDX Series direct fit instrument system features a large TFT display which allows you expand upon the six analog gauge readings. Available in either a black or silver alloy gauge-face, each HDX system allows the user to select independent illumination colors for the gauge readings and needles, as well as the message centers. Calibration and personal settings are manipulated with the built-in, capacitive-touch buttons, or the available Bluetooth app for Apple and Android devices. Each needle hub is black nickel plated spun-aluminum to match the buttons. All HDX instrument systems feature dead-faced indicators (turn signals, high beam, check engine, cruise control, parking brake, plus two user-definable), and a red, settable warning light for each gauge. With the Dakota Digital central control box, installation is greatly simplified with vehicle-harness sourced signals which are connected cleanly to their respective terminals on the supplied solid state sending units. A Danchuk #933 gear shift position sending unit is necessary to use the automatic gear shift indicator function in this unit. **Bezels and housings not included.**

**HLC, DAKOTA DIGITAL CLOCKS**

The Dakota Digital HLC clock is for use with the HDX series of digital instruments. It is not a stand alone unit but plugs into the HDX control box with the included 6-pin cable. The HLC clock gets all its information and power from the HDX control box when the key is on. Its internal clock will keep track of time and move the hands while the key is off, the clock will update to whatever time the HDX system has when the key is turned back on. The HLC will automatically set itself when it is plugged into the control box. Setting the time is done in the HDX system and the illumination for the clock dial and hands is controlled by the HDX control box. It will match the settings of the HDX system.

**DAKOTA DIGITAL RTX DASH INSTRUMENTS**

The RTX series is the latest from Dakota Digital, focused on retaining that stock look without sacrificing the late-model features you love. Every effort has been put forth to incorporate OEM design elements regarding the layout, face styling and indicators. A casual glance may dismiss these as original equipment, but once you hit the switch and the LED backlighting comes on in your favorite color scheme, all doubts will be removed. Starting from scratch, CNC machined housings are filled with electronics designed and built in-house, helping Dakota Digital once again raises the bar for aftermarket instrumentation. The high-definition TFT message centers can be fully configured to display just about any piece of information needed, or just leave the vintage-looking tumbler odometer on the screen for a totally stock appearance. As you've come to expect from Dakota Digital, the RTX series utilizes a central control box to make installation and setup as easy as possible. **Bezels and housings not included. Note: A Danchuk #933 gear shift position sending unit is necessary to use the automatic gear shift indicator function in this unit.**

**DAKOTA DIGITAL VHX SERIES DIGITAL INSTRUMENT SETS**

Dakota Digital's VHX instruments are the perfect combination of digital and analog. Fully lit needles, backlit faces and a highly visible LCD message center are a few of the features that you can see which set the VHX series apart from yesterday's traditional approach to instrumentation. A few of the things you can't see are the micro-controlled precision stepper motors, solid state sensors for unparalleled accuracy, and user-customizable display feedback, all supported by an unrivaled limited lifetime warranty. These gauge sets will install directly into the stock instrument bezel of any model 1955-1957 classic Chevy. Sender and adapters provided fit almost all small block, big block and LS motors. **Bezels and housings not included.**

**DAKOTA DIGITAL DASH INSTRUMENTS**

With this high-tech dash system, you can have digital instrumentation in your 1955-57 bezel assembly without modification to your dash. One of the hottest features of this 5-gauge system is the cool blue vacuum fluorescent readout—a display that is so easy to read that even in full sunlight all the details are clear and crisp. Oil, water, fuel, and voltage readings begin flashing when the car is operating outside normal running limits, the display dims for night driving and an internal memory feature holds the odometer reading when the battery is disconnected. The system also features tachometer readouts to 8000 RPM, speed readouts to 255 MPH, and an automatic transmission gear shift indicator. Sender is not included, sold separately. Metric conversion models and custom color displays are available by special order. **BEZELS AND HOUSINGS NOT INCLUDED.**

**DAKOTA DIGITAL SPEEDOMETER GPS INTERFACE**

The Dakota Digital speedometer GPS interface modules are specifically made for the custom automotive market. Their highly advanced electronic and software design allows them to work unlike anything else, with accelerometers and predictive software to compensate for the times when GPS inherently struggles: overpasses, mountains, tunnels, heavy tree cover, large buildings, passing large vehicles, etc. Their unique electronic architecture provides for negligible current usage when off, and yet they offer lightning fast start-up and signal acquisition. Updating the speed information 10 times per second provides tremendous accuracy, while their integrated omnidirectional antenna provides for installation flexibility and simplicity. The Dakota Digital speedometer GPS interface modules do such a tremendous job of rendering the correct speed information, they can be used to feed an aftermarket cruise control system. They can be used in conjunction with a Dakota Digital VFD3 or VHX instrument system and the modules are also fully compatible with other electronic speedometers on the market.

**THREE-POINT RETRACTABLE FRONT SEAT BELTS**

These bolt in 3-point retractable seat belts are just the ticket to bring late model safety features to your classic. They feature a chromed flip buckle and come in 16 colors. Attaching hardware is included in the kit. Hardware may be different than shown. Use our driver quality seatbelts for the rear, they are a perfect match. All installations may require modifications and will not work with 4-door hardtops. For best results, download installation instructions from our website by searching by part number to better understand requirements for your specific model. **Note: For proper and safe installation you will need to mount anchor plates into the vehicle. Cutting of the "B" pillar in sedan and wagon models is required for proper anchor plate installation as well as some cutting for hardtop or convertible applications. You can bolt the anchors in place but welding may be required.**

**LIZARDSKIN CERAMIC INSULATION**

LizardSkin's Ceramic Thermal Insulation coating is a spray-on thermal insulation product for all cars, wherever heat is a problem. With LizardSkin's spray-on ceramic thermal auto insulation, heat entering the interior is reduced by 30°F or more, making for a cooler, more comfortable ride. For maximum automotive thermal performance, encapsulate the entire interior and all appropriate exterior surfaces.

**DYNAMAT NOISE REDUCTION PRODUCTS**

Headers, blowers, gear-driven timing, and extra-wide tires create all forms of racket in modified cars. Dynamat is the solution for these difficult noise problems. It reduces engine and road noise, and can also be used to create a neutral acoustic environment for car audio systems. There is no better way to bring contemporary riding comfort to your favorite restoration project than Dynamat.

**DYNAMAT HOODLINER**

One mil reinforced mylar thermal barrier repels 97% of the heat in the engine compartment. Underneath the thermal barrier is 3/4" of Sound Soaker™ urethane acoustic foam to absorb engine noise. The Hoodliner can be applied directly to the inside of the hood or applied over Dynamat 6211 for even greater noise reduction. 3/4" x 32" x 54" in size.

**DYNAMAT SUPERLITE TRIPAK**

30% lighter. 30% thinner. Dynamat SuperLite is a high-efficiency sound damping material used to stop noise and vibration in your automobile. It is the same sticky butyl rubber constrain layer damper as Dynamat Xtreme in a 30% thinner, and lighter form. Use Dynamat SuperLite when you need to quiet your car and get better sound, without adding too much weight.

**DYNAMAT DYNAPAD**

DynaPad is a four-layer composite barrier that provides excellent sound control and heat insulation. This heavier material utilizes "Dis-similar Layer Insulating" technology that solves two of the most difficult automotive problems - exhaust system heat and low frequency noise. DynaPad is used primarily on the floor.

**LOKAR SELF LOCKING HOOD AND TRUNK PROP RODS**

Lokar's adjustable-level self-locking hood and trunk props are made of high quality billet aluminum and stainless steel. When the hood or trunk is raised, the hood and trunk prop will automatically lock itself into position, eliminating the need for two hands when opening your hood or trunk. There are two versions of the hood and trunk rod, three and six level. Each level of the six-level prop increases the opening of the hood or trunk by approximately six inches. Each level of the three-level prop increases the opening of the hood or trunk by approximately 12 inches. Made for universal applications.
